

Certificates and Diplomas Explained

Electa LMS provides teachers with an option to issue a certificate or diploma upon the completion of their course.

The teachers are able to issue a certificate/diploma from already prepared various templates see [How to issue certificate](#) or diploma or they can create their own, see [How to create custom certificate diploma templates](#).

The teachers can send links of the issued certificates to students.

Certificates are regular PDF files. They can be downloaded and printed as regular PDFs.

Please, check out all our articles about Certificates and Diplomas before issuing certificate or diploma for your course.
